

What makes Ecoer different and better

- 1) Ecoer's PCB Board has been **simplified and condensed down** in size. Making it easier to work on with more space for your tools. Ecoer owns it technology unlike the competition.
- 2) We have taken the technology of our competition and worked out any issues or bugs for an **advanced 2.0 version. (Simple but smart)**
- 3) We are the only HVAC manufacture that has incorporated **energy efficient inverter with smart IoT technology.**

- 4) We offer **key features that others don't**. This provides unparalleled ease of installation and comfort to the homeowner. (ie. **Auto Charge, EZ PCB Board LED with step by step guide, simple plug-in for IoT Gateway, 6 built-in sensors, programmable ultra-quiet mode, dehumidification mode, and Contractor App for being connected to the customer's unit and data)**

- 5) **High Quality Parts**- Mitsubishi Compressor, Panasonic brushless fan motor on outdoor unit, ECM motor on all air handlers.
- 6) Initial **3 years free IoT monitoring** with each outdoor unit, with an additional 2 or 7 years of additional monitoring available for up to a total of 10 years.
- 7) Able to reach **17-20 Seer at an affordable and competitive price**, saving the homeowner up to 50% on their electric bills. We have the data to prove it and share it with the homeowner quarterly.
