

How Ecoer and its (ESS) Monitoring Benefits Homeowners:

- 1) The **true variable speed inverter compressor** creates the highest level of energy efficiency and performance in residential HVAC equipment. This provides ultimate comfort and quiet operation.
- 2) Allows the **contractor to monitor the homeowner's system performance in real-time, and make certain system adjustments remotely**, by using the Ecoer App. saving time and money.
- 3) Allows the **contractor to react immediately, if there is a critical issue** with the system. The contractor will know the issue and what is needed to fix it before coming out. Faster and more accurate response time.
- 4) Allows **homeowner to receive alerts only in the event of a critical issue**. Know only when it is important and necessary.
- 5) Allows **homeowner to have remote access to their system and adjust temperature** settings with the use of the Ecoer WiFi Thermostat and App. Remote access to help with energy savings and custom temperature setting.
- 6) Allows **homeowners to experience their energy savings and return on investment** with Quarterly Energy Reports direct from Ecoer. Understand how much you are saving compared to guessing or trying to figure out on your complicated energy bill.
- 7) **Homeowners can enjoy peace of mind** knowing they have a great 10 years Parts Warranty and their system is being monitored 24/7 by Ecoer and their contractor.
