About Ecoer

The Most Innovative Residential Ducted Heat Pump and AC System Available

Ecoer Inc. was established in 2016. We are a US company focusing on offering the best ducted Residential Air Conditioner and Heat Pump systems using Inverter and “Smart” IoT Technology.

Ecoer has grown to multiple locations in 4 countries: the United States, Canada, Japan and China. Ecoer both designs it's equipment and owns all rights to its technology.

Ecoer’ s goals are to provide a high-efficiency product at an affordable price, simplify the inverter install process and connect the contractor to the homeowner and their systems. By doing this, we hope to see more inverters used in the US residential market, making it easier and faster to install for the contractor and helping save money and energy, with a quicker and more accurate response time for the homeowner.

Ecoer’ s Mission Statement is: Making your home Green and Smart.

IoT Gateway

Their system will be installed and set up to its optimal performance level using IoT cloud-based technology.

- **Installed Process:** Minimizes the risk of human error.
- **Running Process:** 24/7 Monitoring; allows remote monitoring to pinpoint performance issues as needed.
- **Unexpected Failure:** Reduce the risk of having a long, unplanned downtime due to an unexpected failure.
- **Software Optimization:** Allows the Ecoer technology team to update and upgrade system controls automatically.
- **Smart Alert:** Alerts installing dealer and Ecoer should there be a problem with the system. Installing dealer can call to schedule an appointment for repairs, sometimes before the issue causes a system disruption.

Worry-Free Air Conditioner

Ecoer's IoT gateway integrated with AI (artificial intelligence) provides powerful data processing. In the past few years has provided thousands of families with a high quality home environment. Ecoer's Technology not only sells air conditioners, but also guarantees your carefree home living environment for the next ten years.

From installation to an operation, Ecoer as HVAC Hero protects your home for a long time!
