

# Inflation Reduction Act 25C Tax Credit

## Qualified Product List

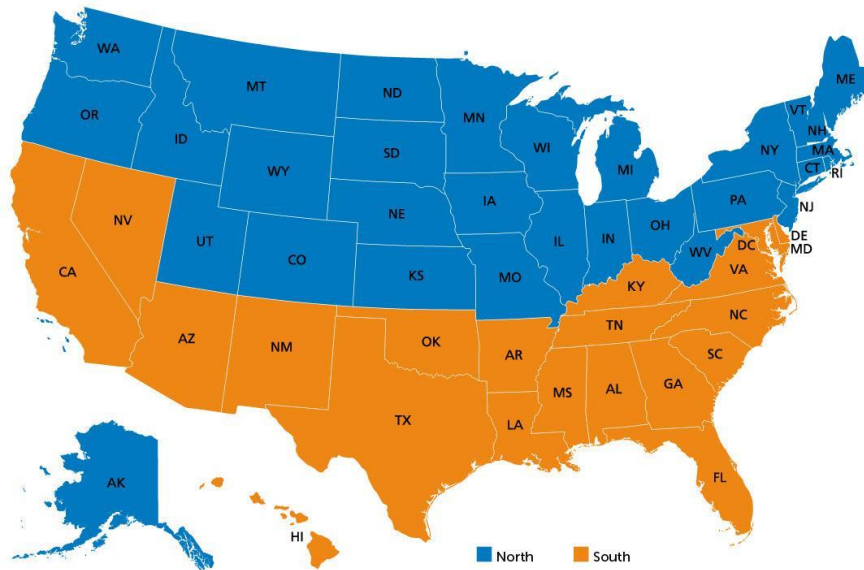

Current List as of Oct 24<sup>th</sup> 2023

### What Is the Inflation Reduction Act of 2022?

The largest ever federal legislation addressing climate change, the IRA invests \$369 billion in clean energy sources and technologies that improve energy efficiency. Part of this includes offering significant rebates and tax incentives to homeowners who purchase heat pumps. These rebates will be administered by each State. Currently, many State agencies are utilizing current AHRI ratings to determine heat pump product requirements.

### CEE Climate Regions

### North and Canada Qualified Product
