

New Product Launch

Expanding your IoT connectivity options

-  Allows Multiple systems to connect
-  More reliable signal coverage
-  10 Year Monitoring Service Included
-  Provides Real-time/history Data
-  No subscription fees
-  No need for a WiFi password

- In instances where multiple systems are in place, the gateway effortlessly receives data from multiple adapters.
- The gateway establishes a direct connection to the router via network cables, guaranteeing rapid and dependable data transmission.

- Ecoer provide a free monitoring service for up to 10 years, while the Ecolink assists in identifying any system issues, ensuring worry-free maintenance.
- Once installation is complete, technicians can instantly view refrigerant and pressure parameters on the ESS Pro APP, ensuring a worry-free installation.

- By using the home Wi-Fi network, there is no necessity for an additional 4G subscription fee, thereby enhancing your comfort experience and reducing costs.
- With no requirement for a network password or intrusion into your home, homeowner privacy is safeguarded.
