# ECOER TDI PRO 2 COIL ONLY SYSTEM

## /// About ECOER TDI PRO 2 COIL ONLY SYSTEM

Introducing Ecoer's TDi Pro 2 Cased Coils (R454B), a cutting-edge solution engineered for exceptional performance and reliability. Featuring grooved aluminum tubing with optimized fins, these coils are perfect for versatile installations and undergo rigorous 500 psi leak testing with mass spectrometry for unmatched durability. Compatible with all major A/C and heat pump brands, including R454B and R32 systems, and backed by a 10-year limited warranty upon registration, the TDi Pro 2 sets a new standard in heating efficiency with easy-access design and corrosion-resistant construction.

### Core advantage:

#### 1 Flexible Installation

- Supports multiple airflow configurations (upflow, horizontal, downflow)  
Offers flexible connection options: 3/8" ODS liquid line, 3/4" NPT condensate drain, and 3/8" ODS suction line.

#### 2 Optimized Heat Transfer

- Grooved aluminum tubing and optimized fins for maximum efficiency.

#### 3 Refrigerant Detection

- With integrated Refrigerant Detection System (RDS)

### Other features:

- Constructed with durable 1-1/2-ton to 3-ton heavy-duty plastic pans or 5-ton heavy-duty galvanized steel pans coated with powder for enhanced corrosion resistance.
- Designed with split access doors in front of the cabinet for easy service access.
- AHRI-certifiable for compatibility with all major A/C and heat pump brands.
- Undergoes multi-stage leak testing at 500 psi with mass spectrometry, ensuring top-notch integrity and long-term durability through factory-sealed nitrogen pressurization.
