

ECOER TDi 2 A-Coil

Smart and Efficient Indoor Comfort

TDi 2 A-Coil represents the next generation of intelligent A-coil, designed to deliver exceptional comfort, control, and reliability. With advanced communication capabilities, flexible refrigerant compatibility, and built-in safety protection, it integrates seamlessly with modern HVAC systems to provide optimized performance for every home.

Core advantage:

⌚ Intelligent Dual Control & Dual Fuel Operation

- The TDi 2 A-Coil intelligently distributes thermostat signals between the Furnace and Outdoor Unit (ODU) for precise coordination.
- When paired with an outdoor system, it supports Dual Fuel functionality independently—without the EST02 module—enhancing installation flexibility and maximizing energy efficiency.

🛡 Smart Connectivity & Enhanced Safety

- With **pre-installed IoT modules**, the TDi 2 A-Coil is ready for **smart home integration**.
- It supports **O/B terminal control** for third-party thermostats, and **external dehumidifier control** (via EST02).
- An integrated A2L refrigerant leak detection and safety system ensures reliable operation and user safety.

🌐 Advanced Sensor Network & EEV Control

- Featuring **multi-point temperature sensor data collection** and **Electronic Expansion Valve (EEV)** management, the system continuously monitors operating conditions to optimize performance, maintain comfort stability, and deliver consistent indoor climate control.

Other features:

- All-Aluminum Heat Exchanger – Ensures long-term durability, efficient heat transfer, and superior corrosion resistance.
- Cold-Air Prevention Function – Delivers warm airflow faster and prevents discomfort during heating startup.
- Dual-Refrigerant Compatibility – Easily configured to support R32/R454B for flexible system applications.
